Assistant-PHD.com: Master Project Blueprint

🎯 Vision Statement

An Autonomous Intelligence Ecosystem managed by AI, owned by the community. Assistant-PHD transforms the 26 domains of life into sovereign assets through a high-performance, multi-modal, and spatial interface.

🎨 UI/UX Identity: The Possibility Engine

- **Dual-Set Carousel:** The Hero section features two synchronized rotating lists (Action + Outcome) to showcase the breadth of the 26 life managers.
- **Aesthetics:** Flashy, high-contrast "Frontier" design with oversized typography, glassmorphism, and neon data accents.
- **Call to Action:** Low-friction "Genesis Waitlist" at the bottom of every page.

🏛️ Triple-Token Economy ($PHD, $AST, $ASS)

- **$PHD (Professional):** Institutional/Academic grade.
- **$AST (Assistant):** Core utility and automation.
- **$ASS (Asset):** Memetic/Creative velocity.
- **Function:** Used for A2A (Agent-to-Agent) and A2H (Agent-to-Human) physical world hires.

🧩 The 26 Life Managers

(See master_domain_list.md for the full breakdown of Home, Wealth, Vitality, Academic, Expedition, and Entertainment modules.)

🛡️ Sovereignty & AI-Owned Operations

- **AI-Owned:** The platform is designed and maintained by its own core agents.
- **Private Cloud/Local-First:** Support for Groq, Hugging Face, X.AI, and local Ollama instances.
